I have been seeing a lot of this lately in email signatures:

Sent from my iPhone

Boring. While my iPhoneer friends don't realize this, they need to change that sig up. I've been trying to come up with a witty replacement, but I just come up empty.

I've tried the confusing quasi-real device name:

Sent from my iBerry

I've tried the fake iPhone next generation, therefore yours is obsolete and you should feel bad:

Sent from my iPhone 3.2GX

I just can't come up with a slam dunk. Help. Please help.

This isn't for me. I don't have an iPhone, nor do I want one. But this would make the world a better place. Think of all the good you can do.
